

Tauqeer Ahmed

STAFF ENGINEER | LEAD BACKEND ENGINEER | Microservices | Distributed Systems | Platform Engineering
Bengaluru, India | +91 93805 21623 | tauqeerahmed.dev@gmail.com | LinkedIn | Portfolio | GitHub

PROFESSIONAL SUMMARY

Staff Engineer and Lead Backend Engineer with 7+ years of experience designing and modernizing microservices, distributed systems, and cloud-native platforms across banking, healthcare, telecom, and enterprise infrastructure. Hands-on expertise in Java, Spring Boot, Spring Cloud, Apache Kafka, Kubernetes, system design, platform reliability, technical leadership, and end-to-end solution delivery.

TECHNICAL SKILLS

Backend	Java 8/11/17, Spring Boot, Spring Cloud, Hibernate, JPA, REST APIs, Microservices	Architecture	Distributed Systems, HLD/LLD, API Design, Event-Driven Architecture, Multithreading
Events & Data	Kafka, Cassandra, DB2, MySQL, PostgreSQL, Liquibase, Camunda, BPMN	Platform	Docker, Kubernetes, Jenkins, CI/CD, Git, GitHub, Bitbucket, GitLab
Quality	JUnit, Mockito, Postman, SonarQube	Observability	Grafana, Prometheus, Zipkin, Promtail

PROFESSIONAL EXPERIENCE

Staff Engineer | Nagarro Dec 2025 - Present

Client: Amway | Enterprise POCs | Bengaluru, India

Technology: Java 17, Spring Boot, REST APIs, dashboard-driven solutions

- Designed scalable REST APIs and backend workflows for enterprise dashboards, analytics, data aggregation, and automation.
- Translated ambiguous business requirements into API contracts, data models, technical prototypes, and implementation-ready solution directions.
- Collaborated with architects, frontend engineers, and business stakeholders on feasibility, service boundaries, security, scalability, and delivery readiness.
- Conducted code reviews, guided engineering practices, and supported engineers through integration and implementation challenges.

Lead Engineer | HCLTech Apr 2025 - Dec 2025

Client: Broadcom | TKGI Platform Engineering | Bengaluru, India

Technology: Java 17, Spring Boot, Docker, Kubernetes, BOSH, Concourse, Angular

- Refactored legacy observability integrations across 6+ services and delivery workflows, reducing technical debt and improving maintainability.
- Resolved 50+ critical and high-severity CVEs across 8+ platform components and supported releases, reaching a zero-critical-CVE production state.
- Supported Kubernetes clusters, BOSH-managed virtual machines, incident investigation, release delivery, and platform reliability improvements.
- Led implementation through production deployment while conducting reviews, mentoring engineers, and collaborating with architects on modernization.

Client: Morgan Stanley | Banking and Investment Management | Bengaluru, India

Technology: Java 17, Spring Boot, Spring Cloud, Microservices, Angular, DB2, Liquibase, JUnit, Mockito, Jenkins

- Decomposed a legacy reporting platform into 8+ Spring Boot microservices, improving deployment flexibility and reducing release dependencies.
- Upgraded three enterprise Angular applications from Angular 7 to Angular 17, reducing frontend technical debt and improving maintainability.
- Delivered 10+ reporting and automation capabilities that reduced recurring manual operational effort by more than 40%.
- Implemented Liquibase schema versioning across Dev, QA, UAT, and Production, enabling consistent deployments and eliminating schema drift.
- Owned feature delivery from analysis and design through production support while conducting reviews, mentoring engineers, and contributing to architecture decisions.

Software Engineer | Optum Global Solutions

Nov 2021 - Dec 2022

Project: IRIS | Healthcare Interoperability | Bengaluru, India

Technology: Java 11, Spring Boot, Microservices, Kafka, MySQL, SFTP, Grafana, Prometheus, JUnit, Mockito

- Designed an HL7-to-FHIR transformation pipeline and 10+ REST APIs supporting standardized clinical-data integrations.
- Built Kafka-backed Spring Boot services for real-time clinical processing and secure downstream healthcare-data exchange via SFTP.
- Automated FHIR validation and testing workflows, reducing manual QA effort by 30% while improving quality and compliance.
- Implemented Grafana and Prometheus monitoring that reduced issue-detection time by 40% and improved operational visibility.
- Maintained 90%+ automated test coverage using JUnit and Mockito across critical healthcare services.

Software Engineer | Tecnotree Convergence Pvt Ltd

Aug 2019 - Oct 2021

Projects: DCBS / DLM | Telecom Billing and Workflow Automation | Bengaluru, India

Technology: Java 8/11, Spring Boot, Microservices, Kafka, Cassandra, MySQL, Docker, Kubernetes, Camunda, BPMN

- Built Kafka-backed Spring Boot services processing 10M+ telecom billing transactions monthly with Cassandra and downstream integrations.
- Designed retry and recovery workflows that reduced failed-transaction manual intervention by more than 80%.
- Implemented parallel consumers and asynchronous processing to improve scalability and throughput for high-volume billing workloads.
- Modernized static dashboards into 15+ real-time operational reports and automated 25+ Camunda/BPMN workflows.
- Standardized configuration and delivery across 10+ microservices using Spring Cloud Config, Docker, Kubernetes, Rancher, and CI pipelines.

EDUCATION

B.E. in Computer Science and Engineering

2015 - 2019

KNS Institute of Technology | Visvesvaraya Technological University (VTU) | Bengaluru, India

AWARDS

- Q4 Result Driven Award - Tecnotree - Recognized for engineering excellence, timely delivery, and scalable telecom billing solutions.
- Value Award - Optum Global Solutions - Recognized for high-quality healthcare platform delivery and reliability improvements through automation.
