

Tauqeer Ahmed

Staff / Lead Backend Engineer

Java, Spring Boot, Kafka, microservices, platform modernization, observability, and delivery ownership across banking, healthcare, telecom, and enterprise platforms.

Bangalore, India

PROFESSIONAL SUMMARY

Senior backend engineer with 7+ years of experience designing scalable backend platforms, leading end-to-end delivery, and modernizing enterprise systems using Java 17, Spring Boot, Apache Kafka, Docker, Kubernetes, and Angular. Known for converting complex business requirements into reliable services, observable workflows, and implementation-ready architecture.

CAREER IMPACT SNAPSHOT

8+	40%+	10M+	90%+
Spring Boot microservices decomposed from a banking monolith	manual reporting effort reduced through automation	monthly telecom billing transactions processed	test coverage on critical healthcare services

CORE SKILLS

Backend	Java 17/21, Spring Boot, Spring Cloud, Hibernate, JPA, REST APIs, Microservices, Liquibase
Events & Workflow	Apache Kafka, event-driven architecture, SAGA patterns, Camunda, BPMN, retry and recovery workflows
Frontend	Angular 7 to 17 modernization, Angular 22 project work, TypeScript, RxJS, responsive UI integration
Data	MySQL, DB2, PostgreSQL, Cassandra, FHIR, HL7, ETL pipelines
Platform	Docker, Kubernetes, TKGI, Jenkins, GitHub Actions, GitLab, Bitbucket, AWS
Quality	JUnit, Mockito, Postman, SonarQube, CI/CD quality gates, observability with Grafana and Prometheus

PROFESSIONAL EXPERIENCE

Lead Engineer | Nagarro

Dec 2025 - Present | Bangalore, India | Enterprise POCs

Leading enterprise POC development and solution shaping for client initiatives including AMWAY.

- Lead feasibility studies and convert ambiguous product needs into reviewable architecture, API boundaries, and implementation plans.
- Own POC delivery from discovery and API design through stakeholder validation and production-readiness planning.
- Build Spring Boot services for analytics, aggregation, workflow automation, and integration-heavy backend use cases.

Stack: Java, Spring Boot, REST APIs, Solution Architecture, Technical Leadership

Lead Engineer | HCLTech

Apr 2025 - Dec 2025 | Bangalore, India | Platform Engineering

Strengthened Kubernetes platform reliability, observability, security posture, and engineering quality on TKGI.

- Drove production security remediation toward a zero-critical-CVE state across the platform.
- Improved operational visibility and simplified monitoring by removing legacy Wavefront dependencies.
- Supported incident response, deployment optimization, technical reviews, and engineer mentoring.

Stack: Kubernetes, TKGI, Observability, Security, CI/CD, Platform Operations

Senior Software Engineer | Wissen Technology / Morgan Stanley

Dec 2022 - Apr 2025 | Investment Management | Strategic Reporting Architecture

Modernized an enterprise banking reporting platform across backend architecture, frontend modules, automation, and release engineering.

- Decomposed a legacy reporting monolith into 8+ Spring Boot microservices, improving deployment flexibility and reducing release dependencies.
- Upgraded three Angular applications from Angular 7 to Angular 17, reducing technical debt and improving maintainability.
- Delivered 10+ reporting automation features including cloning, bulk operations, scheduling, and input processing, reducing manual effort by 40%+.
- Implemented Liquibase schema versioning across Dev, QA, UAT, and Production to prevent schema drift.
- Owned 20+ feature deliveries from requirements and design through implementation, testing, deployment, and support; reviewed 20+ feature changes.

Stack: Java 17, Spring Boot, Spring Cloud, Microservices, Angular, DB2, Liquibase, Jenkins, CI/CD

Software Engineer | Optum Global Solutions

Nov 2021 - Dec 2022 | Healthcare | Falcon

Built healthcare interoperability services for HL7-to-FHIR transformation, real-time clinical event processing, and secure data exchange.

- Designed HL7-to-FHIR transformation pipelines supporting standardized clinical integrations.
- Built 10+ REST APIs and Spring Boot microservices for real-time clinical event processing with Kafka and SFTP exchange.
- Automated FHIR validation and testing workflows, reducing manual QA effort by 30% and improving data quality.
- Implemented Grafana and Prometheus monitoring, reducing issue detection time by 40%.
- Reached 90%+ automated test coverage on critical healthcare services using JUnit and Mockito.

Stack: Java 17, Spring Boot, Kafka, FHIR, HL7, MySQL, Grafana, Prometheus, JUnit, Mockito

Software Engineer | Tecnotree Convergence

Aug 2019 - Oct 2021 | Telecom | DCBS, DLM

Built telecom billing and workflow automation platforms using event-driven services, distributed processing, BPMN orchestration, and cloud-native delivery.

- Designed Spring Boot microservices to process 10M+ telecom billing transactions monthly with Kafka, Cassandra, and downstream URA integrations.
- Created retry and recovery workflows that reprocessed failed billing transactions, reducing manual intervention by 80%+.
- Modernized static dashboards into 15+ real-time operational reports.
- Automated 25+ business workflows using Camunda and BPMN, reducing manual processing effort by 60%.
- Standardized configuration and deployment across 10+ microservices using Spring Cloud Config, Docker, Kubernetes, Rancher, and GitHub pipelines.

Stack: Java 17, Spring Boot, Kafka, MySQL, Cassandra, Camunda, Docker, Kubernetes, Jenkins

SELECTED PROJECT

ShopVerse | Personal Architecture Project

github.com/taukhir/shopverse | taukhir.github.io/portfolio

Production-minded commerce reference platform used to demonstrate full-stack architecture decisions.

- Built Java/Spring microservices with API Gateway, Eureka discovery, centralized config, JWT/JWKS security, Kafka choreography SAGA, outbox, Docker, CI, and observability.
- Added ShopVerse Web, an Angular 22 client covering storefront, auth, cart, checkout, orders, account, and admin operations.

Stack: Java 17, Spring Cloud, Kafka, Docker, Angular 22, TypeScript, RxJS, MySQL, Grafana, Prometheus

EDUCATION, DEVELOPMENT, AWARDS

Education	Bachelor of Computer Science & Engineering, KNSIT, Karnataka, India
Development	Java, Spring Framework & Spring Boot - JSpiders; Data Structures & Algorithms; Microservices Architecture; Event-Driven Architecture with Apache Kafka
Awards	Q4 Result Driven Award - Tecnotree; Value Award - Optum Global Solutions
