

PROFESSIONAL SUMMARY

Staff/Lead backend engineer with 7+ years of experience designing scalable backend platforms, leading end-to-end delivery, and modernizing enterprise applications across banking, healthcare, telecom, and platform engineering. Strong in Java 17/21, Spring Boot, Kafka, microservices, Kubernetes, observability, CI/CD, platform reliability, and Angular modernization.

TECHNICAL SKILLS

Languages	Java 17/21, JavaScript
Backend & Frameworks	Spring Framework, Spring Boot, Spring Cloud, Hibernate, JPA, REST APIs, Microservices, Apache Kafka, Liquibase
Architecture	Distributed Systems, Event-Driven Architecture, SAGA, Outbox, Workflow Automation, ETL Pipelines, Multithreading
DevOps & Infra	Docker, Jenkins, Kubernetes, TKGI, BOSH, Concourse, Rancher, AWS, Git, GitHub, Bitbucket, GitLab
Testing & Quality	JUnit, Mockito, Postman, SonarQube
Database & Frontend	MySQL, DB2, PostgreSQL, Cassandra, Angular 17/22, TypeScript, RxJS
Observability	Grafana, Prometheus, platform monitoring, alerting, operational visibility

SELECTED IMPACT

50+ CVEs critical/high vulnerabilities remediated across 8+ platform components	20+ features owned or reviewed from requirements through deployment and support
10M+ transactions monthly telecom billing volume processed through Kafka services	90%+ coverage critical healthcare service test coverage using JUnit and Mockito

PROFESSIONAL EXPERIENCE

Staff / Lead Engineer | Nagarro

Dec 2025 - Present | Bangalore, India | Enterprise POCs

Leading enterprise POC development and solution shaping for client initiatives including AMWAY.

- Lead feasibility studies and convert ambiguous product needs into reviewable architecture, API boundaries, implementation plans, and stakeholder-ready delivery roadmaps.
- Own POC delivery from discovery and API design through validation, production-readiness planning, code reviews, sprint estimation, and engineer mentoring.
- Build Spring Boot services for analytics, aggregation, workflow automation, ETL-style processing, and integration-heavy backend use cases.

Stack: Java, Spring Boot, REST APIs, Solution Architecture, Technical Leadership, ETL, Mentoring

Professional Experience Continued

Lead Engineer | HCLTech / Broadcom

Apr 2025 - Dec 2025 | Bangalore, India | Tanzu Kubernetes Grid Integrated Edition

Strengthened enterprise Kubernetes platform reliability, observability, security posture, and release quality across TKGI product streams.

- Resolved 50+ critical/high-severity CVEs across 8+ platform components and multiple supported releases, driving 100% compliance and zero production security incidents.
- Removed tightly coupled legacy observability components across 6+ platform services, deployment pipelines, and build workflows to reduce technical debt.
- Managed Kubernetes clusters, Pods, and BOSH-managed VMs supporting monthly major, minor, and patch release streams.
- Led feature delivery from design through implementation, testing, production deployment, architecture reviews, mentoring, and release support.

Stack: Java 17, Spring Boot, Docker, Kubernetes, TKGI, BOSH, Concourse, Angular, Security, CI/CD

Senior Software Engineer | Wissen Technology / Morgan Stanley

Dec 2022 - Apr 2025 | Banking and Investment Management

Modernized a strategic reporting platform by transforming a legacy monolith into scalable microservices, automating reporting workflows, and improving release reliability.

- Decomposed a monolithic reporting platform into 8+ Spring Boot microservices, improving deployment flexibility and reducing release dependencies.
- Upgraded three Angular applications from Angular 7 to Angular 17, reducing technical debt and improving frontend maintainability and performance.
- Delivered 10+ reporting automation features and reduced manual effort by 40%+ across report cloning, bulk operations, scheduled jobs, and input processing.
- Implemented Liquibase schema versioning across Dev, QA, UAT, and Production to eliminate schema drift and stabilize deployments.
- Owned delivery of 20+ features and reviewed 20+ feature deliveries from requirement analysis through design, testing, deployment, and production support.

Stack: Java 17, Spring Boot, Spring Cloud, Microservices, Angular, DB2, Liquibase, Jenkins, CI/CD

Software Engineer | Optum Global Solutions

Nov 2021 - Dec 2022 | Healthcare | Falcon

Built healthcare interoperability services for HL7-to-FHIR transformation, real-time clinical event processing, secure data exchange, automation, and observability.

- Designed HL7-to-FHIR transformation pipelines supporting multiple clinical integrations and standardized healthcare data exchange.
- Built 10+ REST APIs and Spring Boot microservices for real-time clinical event processing with Kafka and SFTP exchange.
- Implemented resilient retry/recovery workflows and automated FHIR validation, reducing manual QA effort by 30% and improving data quality.
- Implemented Grafana and Prometheus monitoring, reducing issue detection time by 40%; reached 90%+ test coverage using JUnit and Mockito.

Stack: Java 17, Spring Boot, Microservices, Kafka, FHIR, HL7, MySQL, Grafana, Prometheus, JUnit, Mockito

Experience, Projects, Education

Software Engineer | Tecnotree Convergence

Aug 2019 - Oct 2021 | Telecom | DCBS, DLM

Built telecom billing and workflow automation platforms using event-driven microservices, distributed processing, BPMN orchestration, and cloud-native delivery.

- Designed Spring Boot microservices to process 10M+ monthly telecom billing transactions using Kafka, Cassandra, and downstream URA integrations.
- Designed Kafka-based parallel consumers and asynchronous processing services to improve scalability and throughput for high-volume billing workloads.
- Created retry/recovery workflows that reprocessed failed billing transactions, reducing manual intervention by 80%+.
- Modernized static dashboards into 15+ real-time operational reports and automated 25+ workflows using Camunda/BPMN, reducing effort by 60%.
- Standardized configuration management across 10+ microservices using Spring Cloud Config, Docker, Kubernetes, Rancher, and GitHub pipelines.

Stack: Java 17, Spring Boot, Kafka, MySQL, Cassandra, Camunda, BPMN, Docker, Kubernetes, Rancher, Jenkins

SELECTED ARCHITECTURE PROJECT

ShopVerse | Personal Architecture Project

github.com/taukhir/shopverse | taukhir.github.io/portfolio

Production-minded ecommerce platform demonstrating full-stack architecture decisions.

- Built Java/Spring microservices with API Gateway, Eureka discovery, centralized config, JWT/JWKS security, Kafka choreography SAGA, outbox, Docker, CI, and observability.
- Added ShopVerse Web, an Angular 22 client covering storefront, auth, cart, checkout, orders, account, and admin operations.

Stack: Java 17, Spring Cloud, Kafka, Docker, Angular 22, TypeScript, RxJS, MySQL

EDUCATION, DEVELOPMENT, AWARDS

Education: Bachelor of Computer Science & Engineering, KNSIT, Karnataka, India

Development: Java, Spring Framework & Spring Boot - JSpiders; Data Structures & Algorithms; Microservices Architecture; Event-Driven Architecture with Apache Kafka; Spring Boot & Spring Framework Advanced

Awards: Q4 Result Driven Award - Tecnotree; Value Award - Optum Global Solutions

ATS KEYWORDS

Java 17, JavaScript, Spring Boot, Spring Framework, Spring Cloud, Hibernate, JPA, REST APIs, Microservices, Kafka, Event-Driven Architecture, SAGA, Outbox, Workflow Automation, ETL Pipelines, Multithreading, Docker, Kubernetes, TKGI, BOSH, Concourse, AWS, Rancher, Jenkins, GitHub, GitLab, Bitbucket, Angular, TypeScript, RxJS, MySQL, DB2, PostgreSQL, Cassandra, Grafana, Prometheus, JUnit, Mockito, Postman, SonarQube, Liquibase, Camunda, BPMN, CI/CD, Observability
